

Note:
-Existing lines in red
-Proposed new lines in blue

New ground gutter line (east of sidewalk) and curtain drain (west of sidewalk), tied in to new dry well and existing line to street

Sump pump exit

East wall gutter termination

Underground PVC drain line. Connected to sump pump and east wall gutter. Terminates in street

New dry well. Connect existing drain line to dry well and new ground gutter and curtain drain lines to dry well. Use existing drain line connection to street as overflow.
