

15' wide

- about 2/12 pitch (avg. height of 6'7")
- 2x2 ceiling tiles on grid
- poly vapor barrier
- 3.5" unfaced batt in bays
- 2x4 ceiling framing

11'

- about 2/12 pitch (avg. height of 7'7")
- textured drywall ceiling
- assumed poly vapor barrier
- assumed 3.5" unfaced batt in bays
- assumed 2x4 ceiling framing (might be 2x6)

5'

- flat ceiling (height of 8')
- textured ceiling
- 2x6 bays with no batt, just some loose "rigid" fiberglass in bays (real odd, yes). Great raceway for wires... and mice. Lots of mice

- poly vapor above the 2x6 framing (sagging into bays a little)
- hodge podge of unfaced batts rolled over vapor w/ some "rigid" fiberglass sheets tossed on top

20'

- dotted line is 12" wide by 8" tall header (drywalled over, unknown actual framing size)

- dotted line is 4" wide by 10" tall header (drywalled over, unknown actual framing size)
