

ZIP SYSTEM® R-SHEATHING // COMMON DETAIL

FOUNDATION // FOUNDATION SPACING

There are many ways the ZIP System® R-sheathing can interact with the foundation. Below are four scenarios, but other options may be viable. For alternative flashing options, see the next page. Follow IRC and IBC separation of WSP to top of finished grade.

Scenario 1: Back of foam flush with foundation.

Scenario 2: Foam over hangs the foundation.

Scenario 3: OSB flush with foundation. Min. 1/2" gap between OSB and foundation.

Scenario 4: OSB/foam connection flush with foundation. Min. 1/2" gap between OSB and foundation.
